The cost of fuel is a fluctuating variable cost of operations which is passed through from our customers to the qualified service providers we retain. It is calculated as follows:

Fuel Surcharge
 Department of Energy
 Washington Hot Line (202) 586-6966
 Standard set weekly by the Federal Government

Application

Each Monday at 4 p.m., the weekly diesel fuel price can be obtained by calling the Energy Information line above. This price will be used to determine the percent increases to be applied to the line haul rate; the increase will become effective on Tuesday of that week and will be effective for the following seven (7) day period.

Guidelines

All charges for line haul transportation resulting from rates and /or charges named in tariffs, contracts or other agreed pricing provisions making reference to this tariff, are hereby or will on their effective dates be increased as provided below.
